

Parmeshwar Gudadhe

DevOps Engineer — Cloud Infrastructure, Automation & CI/CD

param@mail.com +918855919797 Pune, Maharashtra, India

SUMMARY

DevOps Engineer with 6+ years of experience in cloud infrastructure, automation and CI/CD across AWS and Azure. Skilled in building scalable, secure platforms using Bicep, Terraform, Ansible and Kubernetes, with hands-on experience in container orchestration, infrastructure as code and CI/CD pipeline design. Focused on automation, observability and reliability across distributed systems.

EXPERIENCE

DevOps Engineer

Sparecode Consulting LLP, Mumbai · May 2023 – Present

Client: Global Professional Certification and Education Organization

- Led the migration of **Azure DevOps Server 2020 to Azure DevOps Services**, covering discovery, planning, pilot, production migration, validation, and post-migration activities.
- Performed detailed assessment of the existing environment, including **projects, repositories, build/release pipelines, agent pools, self-hosted agents, and Azure DevOps/SQL Server dependencies**.
- Coordinated the required **SQL Server upgrade/migration stepping-stone** to bring the existing Azure DevOps Server environment to a supported version before migrating to Azure DevOps Services.
- Migrated and validated **source repositories, build pipelines, release pipelines, agent configurations, and associated DevOps workloads**, ensuring application delivery processes continued after migration.
- Troubleshoot migration-related issues involving **Azure DevOps agents, pipelines, permissions, authentication, network/VPN access, and Azure DevOps tooling**.
- Worked with stakeholders and migration teams to document prerequisites, access requirements, migration dependencies, validation steps, and production cutover activities.
- Managed Azure cloud infrastructure including **App Services, VNets, subnets, firewalls, load balancers, routing and VPN gateways**, ensuring highly available and secure environments.
- Built and optimized **Azure DevOps CI/CD pipelines** and enforced **Git/GitHub repository standards, branching strategies and pull-request workflows** for version-controlled, faster and more reliable deployments.
- Containerized applications with **Docker** and deployed scalable workloads on **Kubernetes (AKS)** with automated scaling, health checks and rolling updates.
- Implemented **Invicti (Netsparker)** for **SAST/DAST**, automating security scans and integrating results into Azure DevOps pipelines.
- Enabled reusable infrastructure patterns using **Bicep**, and automated provisioning and configuration with **Shell and Python scripts** to standardize deployments and enable self-service.
- Implemented monitoring and observability with **Datadog, Azure Monitor and CloudWatch**, while enforcing **IAM access control and secure configurations** to improve reliability and reduce MTTR.

Junior Associate

Affinity Express, Pune · Aug 2020 – Nov 2021

Client: Global Mass-Customization and Digital Commerce Platform

- Provisioned and managed AWS infrastructure (EC2, VPC, IAM, S3, Route53, CloudWatch) supporting production workloads, with CloudWatch monitoring and alerting for proactive issue detection.
- Developed CI/CD workflows to automate code deployments using Git and Jenkins, working closely with development teams to integrate build, test and deployment stages.
- Implemented Terraform for cloud provisioning and Ansible for configuration automation, and automated backup, log archival and health-check tasks.
- Performed Linux server administration (Ubuntu, Amazon Linux) including patching, troubleshooting and performance optimization.
- Integrated security checks into CI/CD pipelines to ensure secure, compliant application deployments.

Junior Production Associate

Affinity Express, Pune · Jan 2019 – Jul 2020

Client: Leading Web Hosting and Domain Services Provider

- Supported cloud-based hosting environments by managing AWS instances, DNS configurations, SSL certificates and server performance.
- Automated recurring operational tasks using Bash scripting for deployments, site migrations and server maintenance.
- Managed application deployments and environment setup for WordPress and web applications on Linux servers, adopting Git for version control and standardized environment management.
- Assisted with IAM hardening, SSL/TLS configuration and security group rules, and performed root-cause analysis of hosting issues to improve uptime.

Project Intern

North Maharashtra University, Jalgaon · Jan 2018 – Dec 2018

GIMP Localization (Marathi)

- Led a team of 8 interns to localize GIMP into Marathi for Linux environments.
- Developed automated build and deployment workflows for packaging and distribution.
- Contributed the localized GIMP build to the GNOME project, making it publicly available to the community.

SKILLS

Cloud Platforms	Microsoft Azure, AWS (EC2, VPC, IAM, S3, CloudWatch)
CI/CD & DevOps Tools	Azure DevOps, Jenkins, GitHub Actions
Containers & Orchestration	Docker, Kubernetes (AKS), familiar with EKS concepts
Infrastructure as Code	Bicep, Terraform, Ansible
Monitoring & Logging	Datadog, Azure Monitor, AWS CloudWatch
Scripting	Shell, Bash, Python
Version Control	Git, GitHub
Security	IAM, Secure CI/CD, SAST/DAST (Invicti, Carrier), Wiz

Certifications

- AWS Certified Solutions Architect – Associate
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure DevOps Engineer Expert (AZ-400)

Education

M.Sc. Information Technology

North Maharashtra University, Jalgaon · Jun 2016 – Jun 2018

Last updated October 2026
